CLINICAL CARE

As part of its comprehensive care model, MSCA offers a full range of services for patients and families. While most of our services are provided on an outpatient basis, our physicians have privileges and relationships with Piedmont Hospital and Tanner Health Systems for inpatient care.

INTERNAL MEDICINE

MS patients receive first-class general medical attention on-site for intercurrent illness in addition to their neurological care.

HOSPITAL SERVICES

While the majority of our care is an outpatient service, the physicians of MSCA have longstanding hospital relationships with Piedmont Hospital and Tanner Health System for inpatient support.

INFUSION THERAPY CENTER

The Tanner MS Infusion Center located at MSCA has a warm, friendly environment featuring a picturesque wooded view to provide a relaxed, comfortable setting for infusion therapy treatments. The infusion center is fully equipped to provide the latest treatments in MS therapy.

NEUROPSYCHOLOGY

Supporting physical and emotional conditioning, MSCA has access to comprehensive neuropsychology support services. These services are readily available for diagnostic evaluation and ongoing clinical care.

CASE MANAGEMENT & PLANNING

The case manager at MSCA is your partner in navigating a wide array of supportive health care services. The scope of services includes assisting patients with issues related to health insurance, disability insurance and social security, procuring durable medical equipment, developing community resources and promoting patient advocacy.

LAB SERVICES

The Multiple Sclerosis Center of Atlanta maintains an onsite Laboratory Phlebotomy Station that is operated by the LabCorp Company. A highly trained and experienced LabCorp phlebotomist is available during business hours Monday-Friday, for the purposes of obtaining specimens for laboratory analysis based on your physician's orders.

Other laboratory testing that is available on-site includes urinalysis and pregnancy testing if your physician deems these tests necessary. The Laboratory at MSCA is CLIA Certified.

NEUROIMAGING CENTER

Our Neuroimaging Center was developed to ensure accurate diagnosis and disease course monitoring. This imaging facility provides convenient and immediate accessibility to these necessary components of MS care.
